

PHIL DINH

DATA ANALYST

Sydney, Australia | phildinhdata@gmail.com | 0451 840 818 | **Website** | **LinkedIn** | **GitHub**

Data Analyst with **3+ years** of experience across retail, marketing, and education. Experienced in converting stakeholder requirements into data models (entities, attributes, relationships), designing databases on-premises and in the cloud, **optimising from the engine level** (disk, RAM). Skilled in Excel (VBA) and Power BI report optimisation from the engine level (VertiPaq), applying correct DAX for different scenarios, and data storytelling. Knowledgeable in ETL pipelines on-premises and in the cloud (AWS, Azure, Microsoft Fabric), website design.

TECHNICAL SKILLS

- BI & Analytics: Power BI (DAX, Power Query, data storytelling), Tableau
- Programming Language: SQL (PostgreSQL, SQL Server, MySQL, DBEaver), Excel (VBA), Python (Pandas, Pyspark, DSA)
- Cloud Platforms & ETL Tools: Microsoft Azure, AWS, Microsoft Fabric, Databricks, Snowflake, Airflow, dbt, Docker, Git, GitHub (CI/CD)
- AI Tools: Claude, ChatGPT, GitHub Copilot

WORK EXPERIENCE

ETTASON | Demand Planning Coordinator | Sydney, Jul 2025 - Present

- Collaborated with sales teams across 4 channels and interstate stakeholders, alongside demand planning, purchasing, and warehouse teams, to gather reporting requirements, model and consolidate datasets, validate data accuracy.
- Automated the extraction, transformation, and consolidation of datasets submitted across 5 states in different formats, including ERP system data and sales channel forecasts, using Excel (**VBA**), Power Query, and Python.
- Modelled tables in a relational database in 3rd normal form with column constraints, correct data types, indexing on key columns, and table relationships following business rules to enhance data accuracy, integrity, and query performance.
- Redesigned gold layer from materialised views to pre-aggregated flat tables, eliminating redundant joins and reducing Power BI report refresh time from **4 minutes to 15 seconds**.
- Developed and delivered **15+ Power BI and Excel** reports for 5 offices, optimising from the engine level (VertiPaq, Power Query, **DAX**), tracking product performance, forecast accuracy, stock allocation, and demand stimulation across 3,000+ SKUs and 50+ suppliers.

MENTORME | Data Analyst (Part-time, 6 hrs/week) | Sydney, Sep 2025 – Apr 2026

- Collaborated with engineers to build an end-to-end AWS pipeline (API → PostgreSQL → Power BI), mapping entities, attributes, and relationships to design the database in 3NF with defined data types, column constraints, and medallion architecture.
- Implemented SCD Type 2 and incremental load strategies in dbt for historical tracking, data accuracy, and query performance.
- Developed **3 Power BI** reports in Import mode, optimising from the engine level (VertiPaq, Power Query, **DAX**) to track student demographics and CV performance, directly informing marketing strategies and product development decisions.

PTE MASTER | Data Analyst | Sydney, Feb 2024 – Jun 2025

- Collaborated with marketing and academic teams to gather reporting requirements, define North Star metrics, and deliver **7+ Power BI** reports optimising from the engine level (VertiPaq, Power Query, **DAX**), tracking student performance, engagement, and page visit behaviour segmented by cohorts and demographics.
- Analysed student skill performance segmented by cohorts and test modules, identified low-performing sections across listening, reading, speaking, and writing, and recommended targeted course adjustments that improved average skill scores by **5%**.

IGA SUPERMARKET | Assistant Store Manager | Sydney, Mar 2022 - Feb 2024

- Reviewed sales trends and 6-month demand forecasts at the product level using the Metcash ERP, collaborating with staff to monitor expiring stock and refine weekly order quantities, reducing overstock and write-offs by approximately **20%**.

MCDONALD'S | Operations Analyst | Vietnam, Apr 2020 - Sep 2021

- Collaborated with stakeholders to develop and deliver **5+ Power BI** reports tracking **30+ operational metrics** across cost, sales, people & operations, and customer experience, segmented by region, manager, and store levels, supporting performance tracking against monthly targets and contributing to a **20%** improvement in customer experience metrics.

PROJECTS

Australia Laundry Sales Dashboard (2024–2025) | Power BI, DAX, Power Query | [Link](#)

- Analysed 1M+ transactions and built dashboards to identify sales trends, inventory gaps, and underperforming regions and products.

Retail (FMCG) Data Pipeline | AWS, Snowflake, dbt, Python, SQL, Power BI, Airflow, Docker | [Link](#)

- Developed an end-to-end data workflow to prepare retail data for Power BI reporting and support scalable, data-driven insights.

EDUCATION

- Data Analyst - Analytics engineering bootcamp | Udemy | Dataexpert.io | Jan 2024 - Now
- Master of Marketing | University of Wollongong | Feb 2023 – Oct 2023
- Master of Supply Chain Management | University of Wollongong | Oct 2021 – Nov 2022

CERTIFICATIONS

- DP-700 (Fabric Data Engineer), DP-600 (Microsoft Fabric Analytics Engineer), AZ-900 (Azure Fundamentals), dbt Fundamentals | [Link](#)
- Databricks Data Engineering Associate, Databricks Fundamentals, Snowflake Fundamentals, Astronomer Apache Airflow
