

PHIL DINH

Data Analyst | Analytics Engineer

Sydney, Australia | phildinhdata@gmail.com | 0451 840 818 | [Website](#) | [LinkedIn](#) | [GitHub](#)

I have been working in the **data industry** for **3+ years** across retail, marketing, and education. My first **priority** is collaboration and building relationships with stakeholders and employees, as I believe it is key to success in my job and long-term career growth. On the technical side, I focus on having solid fundamentals and a strong understanding of architecture, coding logic, and data flow so I can leverage AI to enhance productivity, cost efficiency, and performance while saving time.

TECHNICAL SKILLS

- BI & Analytics: Power BI (DAX, Data Modelling, Power Query), Tableau
- Data Analysis: SQL (PostgreSQL, SQL Server, MySQL, Dbeaver), Excel (VBA), Python
- Cloud Platforms & ETL Tools: Microsoft Azure, AWS, Microsoft Fabric, Databricks, Snowflake, Airflow, dbt, Docker, Git, GitHub (CI/CD)

WORK EXPERIENCE

ETTASON | Demand Planning Coordinator (Analytics Engineer) | Sydney, Jul 2025 - Present

- Collaborated with sales teams across 4 channels and interstate stakeholders, alongside demand planning, purchasing, and warehouse teams, to consolidate forecasts, validate data accuracy for reporting, and support ad hoc analysis for planning decisions.
- Developed and delivered **10+ Power BI** reports and an integrated Demand & Inventory **Planning system** in Excel (VBA) with daily and weekly refreshes, monitoring 3,000+ SKUs across 50+ suppliers and enabling visibility into sales trends, inventory risks, SKU performance, and forecast accuracy.
- Consolidated and transformed data from 3 sources (Microsoft Dynamic 365, Anaplan and email) across 5 states into a data warehouse using Excel (VBA), Power Query, and SQL, designing denormalized and star schema models based on stakeholder requirements to support consistent reporting and planning systems.
- Collaborated with senior demand planner to improve reporting refresh performance by redesigning warehouse schemas, removing redundant joins, and converting materialized views into materialized tables in the gold layer. **Backup** Excel system code base successfully when it failed, also reducing planning systems refresh time from **7 hours to 3 hours**.

MENTORME | Analytics Coach & Data Analyst (Part-time, 6 hrs/week) | Sydney, Sep 2025 – Present

- Collaborated with the Head of Academics and Student Consultants to deliver a 12-week analytics program focusing on Excel, SQL, and Power BI, enabling mentees to build business-focused dashboards including real datasets from the company's AI CV platform.
- Collaborated with data engineer and backend engineer to develop and deliver an **end-to-end AWS pipeline** (API → AWS PostgreSQL → Power BI), including **2 Power BI reports** to track student demographics (gender, city, age, education, skills, industry) and CV performance analysis (strengths, gaps, recommendations, formatting issues) from the company's AI CV platform.
- Analysed and presented insights to engineering, marketing, and leadership teams, recommending **front-end improvements** for data input quality. Also, supporting targeted marketing strategies, and providing visibility on student growth, CV performance, and user feedback, contributing to a **25%** increase in platform traffic.

PTE MASTER | Data Analyst | Sydney, Feb 2024 – Jun 2025

- Collaborated with marketing, product, and academic teams to gather reporting requirements, define **North Star metrics**, and track student performance, engagement, and page visit behaviour segmented by demographics.
- Collaborated with senior data analysts and data engineers in **Azure Databricks** to build star schema models in the gold layer and deliver 5 Power BI reports supporting business monitoring and decision-making.
- Analysed and presented student skill performance reports segmented by cohorts and test modules, identifying low-performing sections across listening, reading, speaking, and writing, and recommending targeted support, learning resources, and course adjustments that improved average skill scores by **5%**.

IGA SUPERMARKET | Assistant Store Manager | Sydney, Mar 2022 - Feb 2024

- Reviewed sales trends and 6-month demand forecasts at the product level using the Metcash ERP, collaborating with staff to monitor expiring stock and refine weekly order quantities, reducing overstock and write-offs by approximately **20%**.

MCDONALD'S | Operations Analyst | Vietnam, Apr 2020 - Sep 2021

- Collaborated with senior and manager-level stakeholders to develop and deliver **5+ Power BI** reports tracking **30+ operational metrics** across cost, sales, people & operations, and customer experience, segmented by region, manager, and store levels, supporting performance tracking against monthly targets and contributing to a **20%** improvement in customer experience metrics.

PROJECTS

Australia Laundry Sales Dashboard (2024–2025) | Power BI, DAX, Power Query | [Link](#)

- Analysed 1M+ transactions and built dashboards to identify sales trends, inventory gaps, and underperforming regions and products.

Retail (FMCG) Data Pipeline | AWS, Snowflake, dbt, Python, SQL, Power BI, Airflow, Docker | [Link](#)

- Developed an end-to-end data workflow to prepare retail data for Power BI reporting and support scalable, data-driven insights.

EDUCATION

- Master of Marketing | University of Wollongong | Aug 2023 – Nov 2024
- Master of Supply Chain Management | University of Wollongong | Feb 2022 – Nov 2022

CERTIFICATIONS

- DP-700 (Fabric Data Engineer), DP-600 (Microsoft Fabric Analytics Engineer), AZ-900 (Azure Fundamentals), dbt Fundamentals | [Link](#)
- Databricks Data Engineering Associate, Databricks Fundamentals, Snowflake Fundamentals, Astronomer Apache Airflow
